Nutech

➤ PaveCoat Clear

Available Sizes:
4, 10 & 20 Litres

A clear coating for painted or decorative concrete surfaces available in a matt, semi-gloss or high-gloss finish. Provides a durable and decorative coating suitable for pedestrian and vehicle traffic.

➤ PaveCoat Colours

Available Sizes:
4, 10 & 20 Litres

An opaque coating for concrete surfaces available in a matt, semi-gloss or high-gloss finish. Available in the full range of 36 Nutech colours. Provides a durable and decorative coating suitable for pedestrian and vehicle traffic.

➤ Spray On SO 2000 Sealer

Available Sizes:
4, 10 & 20 Litres

A non-yellowing, semi-gloss sealer that can be applied with a sprayer. Improves the colour and durability of concrete surfaces, and is suitable for pedestrian and vehicle traffic.

➤ PaveCoat Cure & Seal

Available Sizes:
4, 10 & 20 Litres

Designed to cure and seal new, green concrete on the day of pouring. Ensures a good bond with PaveCoat Clear or Coloured. Suitable for pedestrian and vehicle traffic.

➤ Agreseal Concrete Sealer

Available Sizes:
20 Litres

A penetrating, non-yellowing, semi-gloss, clear sealer that creates an attractive "wet look" to exposed aggregate and concrete surfaces. Suitable for pedestrian and vehicle traffic.

➤ PaveCoat H₂O

Available Sizes:
4, 10 & 20 Litres

A water based, environmentally friendly addition to the pavecoat range, available in clear and the full range of 36 Nutech colours. Provides an even, satin finish and is just as durable as the original Pavecoat formula. Suitable for pedestrian and vehicle traffic.

Sealed sloping and very smooth concrete surfaces can affect pedestrian and vehicle safety, subject to the surface texture and slope. Nutech Anti-Slip Additive is always recommended with testing before sealing. Refer to the Nutech Anti-Slip Additive Technical Data Sheet for more information.

The product descriptions listed in this catalogue are a guideline only. Please consult your nearest Nutech Distributor or Nutech Branch for detailed Technical Data Sheets and for any additional information relating to specific job application requirements.

Nutech Paint

For a perfect finish!

▶ Aqua Epoxy

Available Sizes:
4 & 20 Litre Kits

A low-odour, high-gloss, clear, water based epoxy. Comes in a two part pack, for interior floors and food preparation areas. Cured coating is impervious to moisture and has excellent durability and chemical resistance. Suitable for pedestrian and vehicle traffic.

▶ AquaFloor

Available Sizes:
4, 10 & 20 Litre Kits

Low odour and high-gloss coating available in clear or coloured. AquaFloor is a water based polyurethane that comes in a two part pack. Used for interiors, commercial and industrial floors. Suitable for pedestrian and vehicle traffic.

▶ EPiC Industrial Enamel

Available Sizes:
4 & 20 Litres

Coloured high-gloss coating suitable for interior concrete surfaces. Has excellent durability when applied over sound enamel coatings or correctly prepared concrete. Suitable for pedestrian and vehicle traffic.

▶ EPiC Polycryl

Available Sizes:
4 & 20 Litre Kits

Polycryl is a high-gloss coating in a clear or coloured two part pack. Provides excellent durability and chemical resistance for both interior and exterior use. Suitable for concrete, timber and metal surfaces after priming. Suitable for pedestrian and vehicle traffic.

▶ EPiC Epoxy 500

Available Sizes:
4 & 20 Litre Kits

A solvent-based epoxy that comes in a two part pack providing a high-gloss finish on interior floors and food preparation areas. Durable, chemical resistant, and available in the full AS2700 colour range. Suitable for pedestrian and vehicle traffic.

▶ EPiC Epoxy 100

Available Sizes:
4 & 20 Litre Kits

A solvent-less epoxy providing a high-gloss finish and self-levels with a high build. Provides a non-slip covering when used with silica sand. Comes in a two part pack, and is durable and chemical resistant. Suitable for pedestrian and vehicle traffic.

Additional Concrete Coating Products:

Anti-Slip Additive for all Sealers

Substantially improves the safety of sealed surfaces in wet and dry conditions.

Petrol Resistant Pavecoat

Specially formulated for surfaces exposed to petrol and mild solvents.

Nu-Slate Sealer

Clear, non-yellowing sealer designed for sealing natural slate flooring.

Silicon Sealer

Impregnating sealer suitable for a wide range of porous substrates with damp proof courses to prevent rising damp.

Nu-Court

Sports surface coating for asphalt and concrete surfaces.

Aqua Stop

Water based silicon emulsion that is VOC compliant, deep penetrating, and water repellent.

EcoSafe Strip

Water Based paint and sealer stripper designed to be environmentally friendly and safe for users.

Seal Repair Solution

Solution used to rectify old or new sealer adhesion problems.

Reactivating Solvent

Used to redissolve old sealers before resealing with new sealer.

EcoSafe Degreaser

Industrial strength degreaser and heavy duty cleaner that is biodegradable, user-friendly and environmentally safe.

Chlorinated Rubber

Semi-Gloss exterior coating for concrete flooring, walls and masonry surfaces.

Activator

Spray-on stencil modifier for primer coat, base coat and topcoat applications

Line Marking Paint

Water based and solvent based. Available in white, safety yellow, signal red and royal blue.

Solvents

Pavecoat Thinners, PR Solvent, EPiC Epoxy 500 Thinners and Polycryl Thinners available in a range of sizes.

EcoSafe Concrete Etch

Water-based etching compound specifically designed to provide a surface profile on bare concrete.

NuPool

NuPool is a high build, two part pack, gloss epoxy coating that is impervious to water and moisture. It creates a high-quality swimming pool coating and is available in 13 standard colours.

Nutech EPiC Industrial Primers:

Industrial Anti-Corrosive Primer Solvent Based

Quick Drying Anti-Corrosive Primer with easy application and good film build. Available in Dark Grey

Used for engineering steelworks, metalwork, machinery and equipment.

Touch dry in 10 minutes at 25oC. Topcoat 30 minutes

Thin with Nutech PR Solvent

Industrial Epoxy Etch Primer Solvent Based

Multiple substrate, single pack epoxy etch primer. Easy to use. Excellent adhesion. Available in Light Grey

Used for metalwork, industrial equipment, commercial equipment. Provides adhesion for top coats

Touch dry in 5 minutes at 25oC. Topcoat 30 minutes

Thin with Nutech Epoxy Thinners

Industrial Waterborne Primer Water Based

Multi surface primer. Versatile and easy to use. Excellent adhesion to timber. Easy to sand

Use on timber products such as doors and trim work with EPiC top coats

Touch dry in 30 minutes at 25oC. Topcoat 2 hours

Thin with water

Rust Converter Water Based

Rust converter and primer which reacts quickly on rusted surfaces, can be top coated with water based and solvent based coatings

Used for steelwork, ferrous metals, concrete reinforcing, galvanised and zinc treated iron surfaces

Touch dry in 30 minutes at 25oC. Topcoat 2 hours

Only use undiluted

Industrial Quick Dry Enamel

Quick drying, easy to use, hard wearing coating with a gloss finish. Very good durability and non-abrasive properties.

Used for stainless steel, blasted steel, aluminium, and galvanised steel

Touch dry in 20 minutes at 25oC. Topcoat 4 hours

Thin with PR Solvent
