

NuTech
Paint for a perfect finish

PAVECOAT

H₂O

Concrete Colour made easy!

- Low VOC
- Water-based
- Non-yellowing
- Highly durable
- Resistant to oil and grease
- Excellent UV light resistance

**Australia's #1
Concrete Sealer**

Australian
Owned & Made

PaveCoat H₂O is a water-based, environmentally friendly addition to the PaveCoat range. Available in clear and the full range of NuTech standard colours. PaveCoat H₂O provides an even, satin finish and is just as durable as the original PaveCoat formula. Suitable for pedestrian and vehicle traffic surfaces.

This single pack water-based acrylic concrete sealer has been developed to achieve excellent penetration and adhesion to concrete, to overcome the problems associated with traditional organic solvent-solution based concrete sealers, **Pavecoat H₂O** is formulated using NANO technology, rapid hardness development, good chemical resistance and excellent adhesion to concrete and masonry surfaces.

Pavecoat H₂O Concrete Sealer is manufactured from a high quality semi-gloss acrylic emulsion and is suitable for sealing interior and exterior concrete surfaces. Most importantly, the sealer has low odour, non-toxicity and non-flammability characteristics.

Pavecoat H₂O has been formulated to provide a concrete treatment which has superior durability properties and provides excellent adhesion and long-wearing performance similar to equivalent organic solvent solution acrylic sealers, without the associated environmental problems.

Designed as a two coat system on high density surfaces, the sealer provides excellent protection against fading or leeching of oxides in concrete and staining or marking due to contaminants, including grease and oil.

Pavecoat H₂O Concrete Sealer is widely distributed throughout Australia and USA for concrete driveways, factory floors, pattern paving, garage floors, workshops, stencil and slate impression concrete.

Pavecoat H₂O has excellent pigment dispersion and is water reducible to suit different application substrates.

Pavecoat H₂O is cost effective and there is no need for solvent thinners or disposing of brushes and rollers. Unlike solvent based sealers that typically cover an area of 4 sq/mt per litre, **Pavecoat H₂O** can be thinned with water and covers an area 6 sq/mt per litre. This equates to a cost saving of 33%. When cleaning up, only use water to wash your tools. These tools can then be reused.

PAVECOAT H₂O

Suitable Surfaces

Asphalt

Concrete

Exposed Aggregate

Available Size: 15 Litres

Features:

- Water-based, low VOC
- Available in clear and 29 standard colours
- Can be custom colour matched upon request
- Highly durable
- Excellent UV light resistance
- Resistant to fading
- Non-yellowing
- Resistant to oil and grease

Suitable for Vehicles

Coloured Finish

Low Odour

Non-flammable

Water-Based

Typical Uses:

- Concrete driveways
- Garage floors
- Factory floors and workshops
- Stencil and slate impression concrete
