

# NuTech

Paint for a perfect finish

- Water Based Paint Stripper
- Removes Most Coatings
- Low VOC
- Bio Degradable
- Non-Flammable
- Easy Clean Up

**ECO-FRIENDLY SOLUTIONS FOR A CLEANER TOMORROW**

For all your paint stripping needs.  
Trust our **ECOSAFE STRIP** range of  
Water-Washup products!

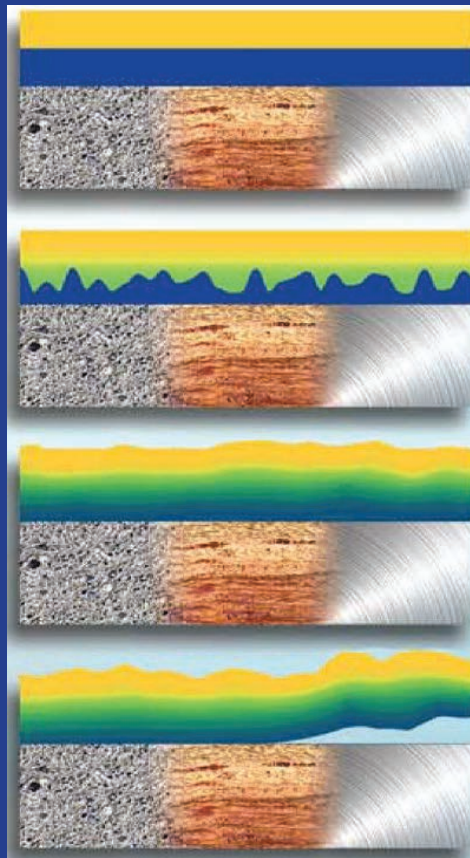

Available in 15lt, 4lt and 1 lt tubs.

## HOW IT WORKS

Products based on NuTech Paint technology work in a completely different way than conventional strippers. Unique ingredients in these products open up the pores in the coating system and travel through these pores until they reach the substrate. This process induces physical stress in the coating, which destabilises the adhesive bond between the coating and the substrate.

The coating lifts slightly and the vacuum created at the interface is quickly filled by oxygen gas released from the product. The resulting change in pressure destroys the remaining adhesion.

Lifting in large pieces, the coating can be scraped off, then washed off with water, leaving the substrate prepared and ready for the new coating.

1. Apply **ECOSAFE STRIP** to surface approximately 3 to 5 millimetres thick.

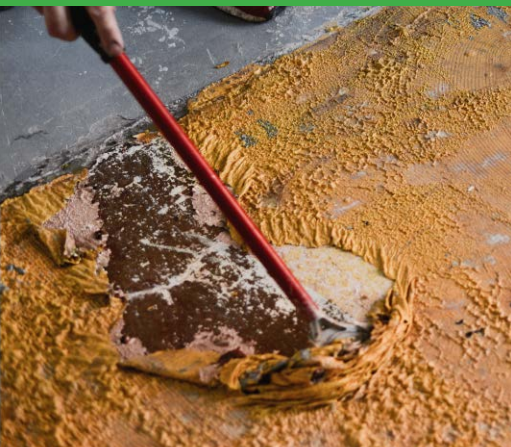

2. Allow the **ECOSAFE STRIP** to do its magic, penetrating through the coatings.

3. The coating adhesion to the surface is released from the substrate.

4. Scrape and high-pressure wash surface ready for recoating.

## Introducing the NuTech EcoSafe Strip Range: Eco-Friendly Solutions for a Cleaner Tomorrow

### CONCRETE, TIMBER, METAL

or any other substrates.

Our **EcoSafe** strip range is specifically formulated to provide powerful paint stripping performance without harming the environment. These products are designed to redefine paint stripping standards, offering powerful solutions while upholding our commitment to environmental safety.

Our **EcoSafe** range is comprised of three exceptional categories: Architectural Stripper, Industrial Coatings Stripper (Sacrificial Remover), and High-Performance Stripper.

These water-based paint strippers are not just biodegradable, non-toxic, and user-friendly but also exceptionally efficient in removing the toughest coatings such as epoxies and urethanes from metal, concrete, wood, masonry, and brick.

The **Architectural Stripper** revolutionises the removal of architectural coatings, efficiently eliminating paints and varnishes with a biodegradable, non-toxic formula, showcasing our commitment to environmental safety.

The **Industrial Coatings Stripper**, or Sacrificial Remover, excels in heavy-duty industrial applications, removing robust coatings like epoxies and urethanes without compromising underlying materials.

Our **High-Performance Stripper** is a top-tier solution for challenging coatings on various surfaces, offering efficient removal with its water-based formula and aligning with our eco-friendly principles.

The NuTech EcoSafe product range also includes:

Graffiti remover  
Rust converter  
Degreaser  
Concrete etch  
EcoZorb

With the NuTech **EcoSafe** Strip range, we invite you to embrace a cleaner and greener future, where effectiveness meets sustainability, setting new standards for the industry.
