FlexiShield

Acrylic Roofing Membrane
for Metal Surfaces

Refinishing System For Metal Roofing

Flexi-Shield is an innovative, nanotechnology modified acrylic polymer coating formulated specifically as a refinishing system for weathered and old coated metal roofing, guttering, metal fencing and metal façade cladding. The unique nanotechnology formulation properties substantially lower surface friction to reduce dirt pick up and retention, providing excellent long-term self-cleanability and exterior durability. **Flexi-Shield** is available in low sheen or matt finishes and can be custom colour matched upon request.

FlexiShield

Flexi-Shield Features & Benefits:

- Water-based
- Low VOC
- Self-cleaning nanotechnology formulation
- 29 Standard colours
- 10-year manufacturer's warranty (details available upon request)
- Excellent durability against the harsh Australian environment
- Total waterproof protection
- Excellent resistance to moss, lichen and surface spoilage bacteria
- Can be custom colour matched upon request
