TileFlex

Acrylic Roofing Membrane

Coloured Acrylic Coating for Tile and Metal Roofs

TileFlex is an innovative, nanotechnology modified acrylic polymer coating designed to substantially lower surface friction to significantly reduce dirt retention and ultimately, aid in the self-cleaning ability of the coating.

CSIRO testing has conclusively shown that the surface friction of **TileFlex** is substantially reduced by the unique properties of surface cleaning nanotechnology. **TileFlex** offers excellent long-term exterior durability which will stay cleaner and retain gloss longer than any conventional acrylic roof coating on the market. **TileFlex** is available in a high gloss finish. It comes in 29 standard colours and can be custom colour matched upon request.

TileFlex contains UV resistant non-fading pigments and tough flexible 100% acrylic polymers which will transform any roof into an attractive and functional surface. **TileFlex** is guaranteed not to peel, fade or crack subject to correct surface preparation and application.

Benefits

- Weatherproof
- Ultraviolet resistant pigments
- Superior longer lasting gloss finish
- Contains nano-technology to repel dirt and retain gloss
- Contains polymer preservatives to provide algae and fungus protection

TileFlex offers:

- ✓ High-gloss finish
- ✓ Drinking water safe
- ✓ Long-term durability
- ✓ UV resistant pigments
- ✓ Protection organic growth
- ✓ Self-cleaning Nano Technology
- ✓ Easy brush, roller or spray application
