COMPANY PROFILE

Since 1972

For over 50 years NuTech has manufactured high quality roof, concrete and eco-friendly products, earning the company a unique position in the protective coatings market,

All NuTech products are manufactured in Australia and distributed from our head office in Seaford, Victoria. We also have fully stocked warehouses in Sydney, Brisbane and Perth.

In 2010 NuTech also opened a distribution outlet in Los Angeles, USA. All products for our export markets are manufactured in Australia.

“Our passion for customer satisfaction, through innovative and environmentally friendly technology, drives our quality and reputation.”

Australian Owned & Made

OVER 50 YEARS OF INNOVATION

NuTech has developed substantial technology for the manufacture and application of a wide range of architectural, industrial and eco-friendly paints and coatings.

NuTech has been awarded with numerous business awards including the Frankston & Peninsula Best Business Award.

NuTech is Australia's foremost expert in roof coating technology with coatings including self-cleaning TileFlex and NXT Cool Zone low VOC heat reflective coatings. These advanced coatings demonstrate the NuTech commitment to solution driven research and development and our environmental and customer driven focus.

Exposure of NuTech products through a diverse range of distribution outlets, such as independent and specialist paint shops, garden supplies, concrete and trade supplies has seen the establishment of a secure and diverse market worldwide.

WHERE INSPIRATION MEETS INNOVATION

PRODUCT INNOVATION

Elevating Standards & Embracing Excellence.

For over 50 years, our Australian made products have exemplified global excellence.

The heart of our success lies in our unique blend of resins, pigments, and additives, ensuring unparalleled durability even in the face of extreme temperatures and challenging weather conditions.

We take pride in not just meeting but exceeding industry standards, making our mark in over 21 countries worldwide.

UNPARALLELED EXCELLENCE

Experience the NuTech difference.

We collaborate with professional painters and DIY enthusiasts, offering products that simplify tasks, ensuring a perfect finish every time. Our dedication to environmental responsibility has led us to develop cutting-edge ultra low VOC coatings, reducing environmental impact and promoting safer work environments for applicators and consumers alike.

With NuTech Paint, you're not just choosing coatings and sealers; you're choosing a history of quality, reliability, and environmental consciousness.

Embracing Growth & Envisioning Tomorrow.

As we reflect on our journey, NuTech Paint takes immense pride in the remarkable growth we've achieved over five decades. Our relentless dedication to quality, innovation, and environmental responsibility has propelled us to the forefront of the coatings industry.

"Our passion for customer satisfaction, through innovative and environmentally friendly technologies, drives our quality and reputation."

29 STANDARD COLOURS

NuTech colours are manufactured from durable fade-resistant pigments to withstand the extreme Australian environment and retain the vibrancy of your finish.

Unlike many other coatings and sealers NuTech products are manufactured from tough acrylic resins and fade-resistant pigments that are durable, flexible and resistant to ultraviolet sunlight. This provides complete UV and waterproof protection.

NuTech coatings and sealers are also environmentally friendly, with our roof coatings being suitable and safe for the collection of drinking water.

Transform your surfaces with NuTech:
Maintain a vibrant finish and superior protection for your roof and concrete surfaces. NuTech products are tailored for the toughest Australian climates.

UniFlex and TileFlex products available in Gloss as standard.

NXT Cool Zone available in Gloss as standard with a low sheen finish available upon request.

FlexiShield available in low sheen as standard with a matt finish available upon request.

* TSR refers to the total solar reflectance, a measure of how well the paint will reflect the sun's heat. This measurement only applies to NXT Cool Zone in gloss finish. The TSR will vary slightly for other NXT Cool Zone finishes.

WHERE INSPIRATION MEETS INNOVATION

EcoSafe PRODUCT RANGE

Our EcoSafe products are meticulously crafted to provide powerful cleaning and preparation performance without harming the environment. These water based products are designed to redefine cleaning and preparation standards, offering powerful solutions while upholding our commitment to environmental safety.

Our EcoSafe range is comprised of the following exceptional categories: Paint strippers, Concrete etch, Degreaser, Rust converter, Graffiti remover along with Moss and Lichen removal products.

These paint stripping and surface preparation products are not just biodegradable, non-toxic, and user-friendly but also exceptionally efficient in removing the toughest coatings and preparing substrates for repainting or sealing.

Eco-Friendly solutions for a cleaner tomorrow.

ECOSAFE

“The environment will thank you”

EcoSafe SURFACE PREPARATION

Architectural Stripper revolutionises the removal of architectural coatings, efficiently eliminating paints and varnishes with a biodegradable, non-toxic formula, showcasing the NuTech commitment to environmental safety.

Industrial Coatings Stripper, or Sacrificial Remover, excels in heavy-duty industrial applications, removing robust coatings like epoxies and urethanes without compromising underlying materials.

High-Performance Stripper is a top-tier solution for challenging coatings on various surfaces, offering efficient removal with its brushable water-based formula and aligning with the NuTech eco-friendly principles.

Other EcoSafe preparation products:

- Concrete etch
- Degreaser
- Graffiti remover
- Rust converter
- Moss rid

With the **EcoSafe Strip** range, we invite you to embrace a cleaner and greener future, where effectiveness meets sustainability, setting new standards for the industry.

ECO-FRIENDLY SOLUTIONS FOR A CLEANER TOMORROW

PRODUCT RANGE

NuTech roof coatings were first manufactured by Nutech in 1972 in Seaford, Melbourne. The business has expanded over the last 50 years and is now Australia's largest privately owned manufacturer and supplier of premium innovative, domestic, commercial and industrial roof coatings.

In 1997 NuTech developed TileFlex after nearly three years of research and development. TileFlex is now highly regarded by trade experts as the best roof coating in Australia. TileFlex is enhanced with nano self-cleaning surface technology to deliver superior performance on any roof surface.

TileFlex has greater water repellency, significantly higher gloss and a surface which will stay cleaner than conventional acrylic roof paint, as proven by independent CSIRO testing. TileFlex is backed with a 12 year manufacturer's warranty.

The NuTech Professional Roof Restoration System includes specially formulated primers, sealers and topcoats for a wide range of roof surfaces.

100% Acrylic Membrane Roof Coatings:

ROOF COATINGS

NuFlex redefines the standards of excellence for cement roof tiles, and all masonry surfaces. Our advanced formula is the result of meticulous research and development, ensuring that every application delivers maximum durability and outstanding performance, even in the face of the harshest weather conditions.

NuFlex is a non-yellowing coating that will provide a waterproof, fade resistant protective coating and is backed with our **10 year manufacturer's warranty**.

The NuTech roof coating product range has been extensively tested and manufactured in Australia under strict quality control conditions.

Our roof coatings are environmentally friendly as well as suitable and safe for the collection of drinking water.

BEAUTIFY AND IMPROVE THE PERFORMANCE OF YOUR ROOF

PRODUCT RANGE

30°C Cooler on the Roof
means 6 to 10°C Cooler
Inside the home

NXT
COOL ZONE

Your solution for a cooler roof and living spaces, with long-lasting protection in the harsh Australian environment.

100% Acrylic Membrane Roof Coatings:

ROOF COATINGS

In 2007 NuTech released **NXT Cool Zone**, a technically advanced heat reflecting roof coating available in a wide range of colours including dark colours such as monument and charcoal. NXT Cool Zone will keep the surface of a roof up to 30°C cooler.

This means it will be 6°C to 10°C cooler inside the home. NXT Cool Zone has ultra-low VOC's and is user friendly and environmentally safe. NXT Cool Zone has a **15 year manufacturer's warranty**.

This remarkable new heat reflecting roof coating utilises revolutionary thermal protection technology to reduce the amount of solar energy absorbed by a roof, dramatically lowering heat build-up, even with dark traditional roof colours.*

For the first time a roof coating reduces the heat of the roof allowing occupants to live more comfortably without sacrificing colour choice. This saves energy and cooling costs. It will also reduce greenhouse emissions and the impact of buildings on the environment.

The use of lighter colours will provide even greater benefits.

BEAUTIFY AND IMPROVE THE PERFORMANCE OF YOUR ROOF

PRODUCT RANGE

FlexiShield

Eco-friendly excellence:

The perfect environmentally friendly solution for your metal roof surfaces.

100% Acrylic Membrane Roof Coatings:

ROOF COATINGS

FlexiShield is a groundbreaking solution in the realm of surface protection, an innovative nano-technology modified acrylic coating meticulously designed to revive weathered and aged metal roofing, (including old colorbond) guttering, metal fencing, and metal façade cladding.

At NuTech, we understand the importance of maintaining the integrity and aesthetics of your architectural investments.

Our product has been engineered with precision to ensure not just restoration, but lasting protection against the elements.

FlexiShield is available in low sheen or matt finishes. It comes in 29 standard colours and can also be custom colour matched upon request.

Our roof coatings are environmentally friendly as well as suitable and safe for the collection of drinking water.

BEAUTIFY AND IMPROVE THE PERFORMANCE OF YOUR ROOF

PRODUCT RANGE

At NuTech, we pride ourselves on delivering exceptional solutions for roof restoration. Our product range stands as a testament to our commitment to quality and innovation.

Our comprehensive selection of roof coatings, primers, and sealers are designed to cater to a diverse array of roofing needs.

Our roof coatings are engineered to provide unparalleled protection against the elements. From scorching sun to torrential rain, our coatings act as a shield, preserving the integrity of your roof.

Our advanced formulas boast fade-resistant pigments and tough acrylic resins, ensuring unparalleled durability against UV sunlight and extreme conditions.

ADDITIONAL ROOF COATINGS & PRIMERS

NuTech offers a range of primers and sealers meticulously developed to enhance adhesion, ensuring a seamless bond with all of our topcoats.

Our primers and sealers are designed to optimise the performance of our coatings, creating a strong and lasting foundation for your roofing projects.

Our range also includes eco-friendly preparation products such as MossRid and our unique Rust Remover & Inhibitor product.

The perfect system to create the Perfect Finish!

BEAUTIFY AND IMPROVE THE PERFORMANCE OF YOUR ROOF

PRODUCT RANGE

DECORATIVE CONCRETE SEALERS

Our concrete sealing products stand at the forefront, reshaping industry benchmarks with unmatched quality and versatility

PaveCoat, our pinnacle solvent-based acrylic penetrating sealer, stands as the epitome of NuTech's unwavering commitment to superior quality and performance. Crafted with precision and unmatched expertise, PaveCoat sets a new standard in the industry, surpassing expectations with its exceptional durability and transformative abilities. Meanwhile, **PaveCoat H₂O**, our water-based counterpart, offers an eco-friendly alternative without compromising on performance. Designed to enhance both aesthetics and durability, it exemplifies our dedication to sustainable construction practices while delivering outstanding results.

PaveCoat, the high-performance solvent-based acrylic sealer, transcends ordinary concrete treatments, elevating spaces to extraordinary realms of beauty and resilience. Its versatility and durability make it the preferred choice of architects and contractors, meeting and exceeding the most demanding project requirements with ease.

Enter a new era of sustainable construction with **PaveCoat H₂O**, our environmentally conscious solution for concrete sealing. This water-based acrylic sealer marries aesthetics with ecological responsibility, offering superior performance whilst minimising environmental impact.

AUSTRALIA'S #1 CONCRETE SEALERS

PRODUCT RANGE

DECORATIVE STONE SEALERS

In an industry defined by innovation, these products have emerged as the epitome of excellence, redefining the standards for functional, decorative, and protective concrete applications worldwide.

Agre Seal stands out as a deep-penetrating solvent-based acrylic sealer, imparting a glossy wet look to aggregate surfaces. Its two-coat system ensures durability, making it ideal for pedestrian areas and light vehicle traffic. Agre Seal redefines concrete aesthetics, offering visually stunning and resilient surfaces that captivate the eye. Engineered with precision, Agre Seal transcends conventional concrete sealers, delivering a transformative glossy finish that enhances the natural beauty of aggregate surfaces. Designed for enduring performance, its deep-penetrating formula ensures lasting protection against wear and tear, while its glossy sheen creates an inviting allure.

With these innovative solutions, NuTech invites you to explore a world where creativity meets resilience, setting new standards in the concrete industry. Join us as we create the pathway to a future where excellence knows no bounds, one surface at a time. Whether it's pathways, driveways, or decorative features, Agre Seal elevates concrete aesthetics, leaving a lasting impression of sophistication and durability.

*Agre Seal is only available in clear.

AUSTRALIA'S #1 CONCRETE SEALERS

PRODUCT RANGE

At NuTech Paint, we take pride in introducing our innovative range of EPiC Industrial Floor Coatings, setting the bar higher in the realm of protective coatings.

With our EPiC series, we redefine what it means to have industrial floor coatings that are not only reliable but also revolutionary.

We understand the unique challenges faced by industrial spaces, from heavy forklift and vehicular traffic as well as exposure to harsh chemicals.

It is this understanding that drives us to develop coatings that offer unmatched durability, exceptional resistance, and long-lasting protection.

Cutting-Edge Industrial Floor Coatings: Setting new standards in durability and protection.

INDUSTRIAL & FACTORY FLOOR COATINGS

The Eco-Friendly Alternative.

Versatile industrial floor coatings for enhanced surface protection. Water-based, eco-friendly versions available, which offer ideal protection for industrial and commercial spaces.

High-performance epoxy floor coatings with superior durability and chemical resistance. 2-pack systems for robust protection in demanding environments.

Discover a new standard in surface protection with EPiC coatings. From the strength of EPiC 500 and Aqua Epoxy to the resilience of Polycryl, our diverse range caters to all industrial floor coating needs.

*Refer to EPiC brochure for colour options.

ENGINEERED FOR PERFORMANCE INDUSTRIAL COATINGS

PRODUCT RANGE

In the world of sports, especially on hard surfaces like tennis and basketball courts, safety and performance go hand in hand. NuTech's anti-slip coatings are meticulously engineered to create an environment where athletes can push their limits with confidence.

NuTech understands the significance of superior sports surfaces and presents a range of high-quality coatings designed to optimise playability, resilience, and aesthetics. Our sports surface coatings, including the versatile NuCourt range, are engineered to meet the rigorous demands of athletes and sports enthusiasts.

NuCourt Sports Surface Coatings:
Excellence in every game.

SPORTS SURFACE COATINGS

NuCourt, the cornerstone of NuTech's sports surface coatings, offers unparalleled durability and a non-slip surface, ensuring optimal grip and safety for players on tennis courts, basketball and netball courts, as well as multipurpose sports surfaces.

For tailored solutions, **NuCourt Roll Coat** provides a seamless, smooth finish, while **NuCourt Pro Coat** offers advanced protection against heavy wear and tear.

NuCourt Fill Coat ensures consistent texture and resilience, enhancing the longevity of the surface, and **NuCourt Line Marking** adds the finishing touch, providing clear and precise game markings.

With the **NuCourt** range, sports surfaces are not just functional; they are transformed into areas that inspire exceptional performance and enduring passion for the game.

*Refer to NuCourt brochure for colour options.

SPORTS COATINGS: EXCELLENCE IN EVERY GAME

PRODUCT RANGE

NuTech leads the pool coatings industry with a focus on durability, elegance, and innovation. Our cutting-edge pool coatings transform ordinary pools into extraordinary aquatic retreats.

NuPool offers superior resistance to pool chemicals and submersion, ensuring lasting beauty and functionality. It combines resilience with elegance, creating a visually stunning and long-lasting pool.

NuPool is available either as a 2 pack epoxy coating or a single pack chlorinated rubber coating.

NuPool Coatings:
Dive into a world of durability, elegance, and innovation.

POOL COATINGS

NuPool Epoxy coating is the pinnacle of durability and versatility, specially designed to resist water damage and chemicals. This long-lasting, high-gloss finish not only enhances your pool's visual appeal but also provides exceptional protection against wear and tear. Its smooth texture ensures a comfortable and safe swimming experience, showcasing NuTech's commitment to quality and long lasting solutions.

NuPool Chlorinated Rubber coating elevates pool protection with advanced technology. Engineered for superior resistance against harsh chemicals and constant submersion, this coating ensures a tough, resilient surface that safeguards your pool for worry-free enjoyment. With exceptional durability and a sleek, glossy finish, NuPool Chlorinated Rubber brings strength and style together for the ultimate poolside experience.

NuPool is available in 10 colours.

DIVE INTO A WORLD OF DURABILITY AND ELEGANCE

ECO PRODUCT RANGE

In 2019, NuTech launched BULLYLINER™, a revolutionary protective coating that redefines durability and versatility in surface protection.

Bullyliner is an eco-friendly rubberised coating made from recycled tyres and advanced water-based nanotechnology-modified resin. It's tough, easy to clean, and stands up to wear and tear.

Bullyliner ensures your surfaces stay protected with minimal effort, being single pack and water-based, and offers a quick fix for unexpected damage.

Bullyliner is a revolutionary blend of toughness, sustainability, and environmental guardianship in protective coatings.

Made from Recycled Rubber

Non-Toxic · Ultra-Low VOC · Water Based · Environmentally Friendly

AUTOMOTIVE ECO-FRIENDLY COATING

Key Benefits:

- Made from recycled rubber
- Water-based, single pack nano-technology
- Can be sprayed, rolled or brushed
- Can be reapplied to itself for easy repairs
- Long-lasting and durable
- Eco-friendly with no VOC's or harmful pre-mixing
- Versatile for use in automotive, off-road, marine, commercial, industrial, and agricultural applications.

Bullyliner is available in 9 colours.

ECO-FRIENDLY SOLUTIONS FOR A CLEANER TOMORROW

ENVIRONMENTAL PRODUCT RANGE

Graphenstone Interior Paints:

Absorbs CO₂ and harmful formaldehyde from interior environments.

Unrivalled Elegance, Sustainability, and Health-Conscious Innovation.

NuTech proudly presents Graphenstone's exceptional interior paints, crafted with precision to enhance elegance and wellness.

These innovative and eco-friendly paints, known for high quality and sustainability, are made with natural ingredients, emphasising lime and graphene technology.

Introducing Graphenstone Interior Products: A harmonious fusion of nature and innovation.

INTERIOR COATINGS

Ecosphere Premium is a revolutionary water-based interior paint infused with advanced graphene nanoparticle technology. This eco-friendly paint delivers unparalleled durability while minimising environmental impact. With low volatile organic compounds (VOCs), Ecosphere achieves a balance between high performance and ecological responsibility.

Atmosphere Interior is a breakthrough in interior paint, designed to elevate living spaces with a perfect blend of aesthetics and performance. This water-based paint offers a low-odor, low-VOC solution, ensuring a healthier indoor environment. With a smooth and durable finish, Atmosphere Interior provides excellent coverage, making it an ideal choice for walls and ceilings.

Enhance your painting experience with Graphenstone's innovative primers.

Carbon Lock Primer: A powerful foundation for surfaces, this primer features advanced carbon locking technology to fortify and prepare surfaces for a lasting finish.

Elite Four2Four Primer: Offering superior adhesion and durability, this primer ensures a smooth and long-lasting base, setting the stage for impeccable interior finishes, on almost any surface.

Colour Blocker Primer: Perfectly formulated to prevent color bleed-through, this primer provides a protective barrier, ensuring vibrant and true colors on your walls.

PIONEERING INNOVATION IN ECO-FRIENDLY COATINGS

ENVIRONMENTAL PRODUCT RANGE

Introducing two groundbreaking exterior solutions.

Biosphere, the ultimate paint, combines nature with advanced graphene technology for unmatched durability. This water-based, low-VOC paint, not only absorbs CO₂ from the atmosphere but also forms a protective shield, offering strength, eco-friendliness, and unique features.

Complementing this is **Atmosphere Exterior**, a premium water-based paint ensuring durability, style, and resistance to the elements, with a unique formulation for strength and flexibility in every brushstroke.

Elevating exteriors with Biosphere and Atmosphere excellence.

EXTERIOR COATINGS

Revolutionary Surface Protection: Hydrox Seal and StopWater Solution.

Hydrox Seal offers top-tier waterproofing, forming a resilient barrier against water damage for long-lasting surface protection. Ideal for various surfaces, it ensures durability and peace of mind.

StopWater, an innovative water repellent treatment, creates a micro-thin barrier to prevent water absorption. Versatile and reliable, it effortlessly enhances water resistance for sustained surface integrity.

Environmental Colour Palette:

Transform your spaces effortlessly with 64 captivating colours for both interior and exterior applications. Visit the user-friendly Graphenstone website or our stockists to bring your design visions to life with this versatile environmental range.

PIONEERING INNOVATION IN ECO-FRIENDLY COATINGS

BRANCH LOCATIONS

The NuTech head office complex encompasses multiple factories, housing manufacturing, raw material and finished goods warehouses. The Seaford location serves as the hub for processing and shipping for all export and interstate orders.

Our manufacturing facility has the capacity to manufacture both large batch as well as make to order small batch products. This provides a unique offering to our customers.

Our Seaford head office also houses our administrative team, who oversee all of our various functions. This includes our national and international customer service and technical sales team.

This structure supports our seamless operations and positions our business for ongoing future growth.
